PROFILE

Third-year Computer Science (AI/ML) student with hands-on experience building and shipping full-stack web applications and machine learning tools for real clients. Comfortable working across the entire stack — from Django REST backends and Supabase databases to React front-ends deployed on Vercel. Experienced integrating third-party APIs and AI tools to deliver production-ready products on time and within free-tier infrastructure constraints.

EDUCATION

B.E. Computer Science Engineering (AI/ML) | Expected 2027

Nawab Shah Alam Khan College of Engineering and Technology, Hyderabad

Intermediate — CS + MPC | 2023

SIS Vocational Junior College

SSC | 2019

Disneyland High School

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML, CSS

Frameworks: Django, Django REST Framework, React, Vite

Databases: Supabase (PostgreSQL), SQL basics

Cloud & Tools: Vercel, Git, GitHub, REST APIs, Postman, Streamlit

AI Integration: OpenAI API, Anthropic API, Prompt engineering, AI-assisted development

PROJECTS

DealPilot — Affiliate Deals Platform

React · Vite · Supabase · Vercel Serverless | thedealpilot.vercel.app

- Built a full-stack deals aggregator targeting Indian Amazon shoppers, integrated with the Amazon Associates affiliate program.
- Designed a responsive product grid with real-time category filters and an admin CRUD panel secured with magic-link authentication.
- Implemented Vercel serverless functions to proxy Amazon PA-API calls, keeping the entire app within free-tier infrastructure limits.
- Optimised the API layer to reduce redundant function invocations and improve page load response times.

MF Medical Supplies — Client E-Commerce Website

React · Django · Supabase · Vercel | mf-medical-supplies.vercel.app

- Delivered a production e-commerce site for a medical supplies business — product catalogue, cart, and checkout flows.
- Built a Django REST Framework backend with Supabase (PostgreSQL) for product data storage and user authentication.
- Integrated Stripe payment gateway to support secure online transactions at checkout.
- Managed the full project lifecycle independently — from client requirements gathering through live deployment.

Rainfall Predictor — ML Mini Project

Python · scikit-learn · pandas · NumPy · Streamlit | rainfall-prediction-wlx2q4w7o6swrpx3adhpg.streamlit.app

- Built a supervised machine learning model to predict rainfall using historical weather data from a structured CSV dataset.

- Applied data preprocessing and feature engineering with pandas and NumPy to clean and prepare the dataset for training.
- Trained and evaluated multiple scikit-learn classifiers, selecting the best-performing model based on accuracy metrics.
- Deployed the model as an interactive web app using Streamlit, allowing real-time predictions from user inputs.

ADDITIONAL

Languages: English (Professional), Hindi (Native), Arabic (Reading / Classical)

Currently: Open to internships and entry-level full-stack / AI application developer roles in Hyderabad or remote
